

COMPANY PROFILE · 2026

Building the Intelligent Future of Enterprise.

Modernizing core business workflows with practical AI solutions, connected automation, and custom systems built around the way your organization works.

Your strategic partner for intelligent operations.

Nexinta I.T. Solutions is an enterprise technology partner that designs, builds, and integrates custom systems around each client's business needs. We embed practical, emerging AI into the systems that drive daily operations, so technology carries the administrative load and your people can focus on high-value work.

Mission

To help enterprises harness emerging AI technology to manage, automate, and optimize their core business systems, reducing operational burden and driving efficient, reliable output.

Vision

To be a trusted technology partner known for building the intelligent future of enterprise operations, one automated system at a time.

Philosophy

Combine intelligent automation with deep system integration to eliminate silos, without requiring a risky, costly total overhaul of what already works.

100%

Intellectual property transfer to the client

End-to-End

Web, systems, and mobile under one partner

2-week

Sprint cycles with continuous visibility

From fragmented workflows to a **connected backbone.**

THE CHALLENGE

Manual processes slow growing enterprises down.

Many maturing organizations still run core operations on disparate tools and human intervention, costing teams hours that should go to strategic work.

- Payroll, purchasing, credit, and sales tracking spread across separate tools and spreadsheets
- Teams tied up in data entry and repetitive manual processing
- Decision-makers relying on stale or fragmented data
- Operations that can't scale quickly to meet new demand

OUR APPROACH

Intelligent digital infrastructure, built around you.

We architect a unified data layer across your organization, embedding automation and AI directly into your existing systems.

- Solutions designed around your actual workflows to maximize adoption
- Integration with your current databases and software, with no full replacement needed
- Real-time data sync and automated decision support across departments
- A stable, scalable foundation for your next phase of growth

We don't simply provide software. We architect the digital future of your organization, so technology handles the administrative burden and your talent focuses on innovation.

Core services, engineered for **your business needs.**

01

Custom Software Engineering

Scalable, enterprise-grade applications that replace manual bottlenecks and modernize legacy processes into high-velocity automated systems.

Internal tools

ERP / CRM

Enterprise suites

02

Intelligent Web & Platforms

Modern websites, client portals, and storefronts that work as active engines for lead capture, qualification, and sales growth.

Corporate sites

Lead-gen hubs

E-commerce

03

Mobile App Development

Cross-platform iOS and Android apps built with Flutter / React Native for field teams, customers, and on-demand services.

Field & staff apps

B2C apps

Dual-app ecosystems

04

Enterprise System & AI Integration

We connect standalone tools into one intelligent ecosystem, embedding practical AI into your existing databases and third-party software.

API connectors

Legacy sync

AI automation

Managed Services & Maintenance

Monthly support plans covering cloud hosting, monitoring, backups, security patching, and dedicated developer hours to keep your systems secure, fast, and evolving after launch.

Automating the processes that **run your business.**

Every organization is different. These are the operational areas where our custom systems most often remove friction, each tailored to your workflows, roles, and existing tools.

Payroll Automation

End-to-end payroll processing with automated computation and compliance scheduling.

- ✓ Tax computation
- ✓ Disbursement workflows
- ✓ Compliance scheduling

Credit & Collection Management

AI-assisted receivables tracking that keeps collections on schedule and visible.

- ✓ Receivables tracking
- ✓ Borrower monitoring
- ✓ Scheduled follow-ups

Sales Operations

Real-time pipeline visibility with performance forecasting and automated tracking.

- ✓ Pipeline visibility
- ✓ Performance forecasting
- ✓ Automated tracking

Lead Generation

Digital channels that capture, qualify, and route leads automatically.

- ✓ AI-powered sourcing
- ✓ Automated lead scoring
- ✓ Nurturing workflows

Purchasing & Procurement

Controlled, automated purchasing across departments with live budget visibility.

- ✓ Automated purchase requests
- ✓ Real-time budget tracking
- ✓ Vendor cost controls

Custom ERP & CRM

A unified operational platform with multi-level permissions and connected modules.

- ✓ Role-based access (RBAC)
- ✓ Legacy system bridges
- ✓ Complete audit logging

Engagements that **scale with you.**

Typical scopes and timelines across our three practice areas.

Custom Systems

SCOPE	KEY CAPABILITIES	TYPICAL TIMELINE
Operational MVP Internal tools · Excel-to-web	3–5 core modules (inventory, invoicing, orders), role-based access, centralized database, CSV/PDF exports	4–6 weeks
Custom ERP / CRM Operations & logistics	8–12 modules (dispatch, waybills, sales pipeline), multi-level permissions, SMS/email alerts, analytics, API connectors	2.5–4 months
Enterprise System Multi-branch core suite	Modular architecture, high-concurrency database, legacy ERP sync, audit trail logging, UAT testing, automated backups	4–8 months

Web Development

SCOPE	KEY CAPABILITIES	TYPICAL TIMELINE
Starter Web Portfolio · Landing page	3–5 custom responsive pages, CMS setup, mobile optimization, basic SEO, SSL, contact forms	2–3 weeks
Corporate Business B2B lead-gen · Content portal	8–15 pages with blog/news, Figma UI/UX design, CRM lead capture, advanced SEO, speed tuning, admin training	4–6 weeks
E-Commerce Suite Retail · Wholesale portal	Custom storefront, PayMongo / GCash / Maya / card gateways, courier rate calculator, live inventory tracking	6–8 weeks

Mobile Applications

SCOPE	KEY CAPABILITIES	TYPICAL TIMELINE
Utility / Companion Field · Driver · Attendance	User login, camera and GPS capture, push notifications, REST API link to your database, offline caching & sync	6–8 weeks
Commercial Business Booking · Marketplace · Loyalty	Custom Figma design system, mobile payments, interactive maps, live status tracking, App Store & Play Store publishing	2.5–4 months
Enterprise Mobile Suite Delivery · Fintech · Multi-vendor	Customer + provider apps, real-time WebSocket tracking and chat, biometric authentication, scalable cloud backend	5–8 months

Final scope, timeline, and investment are defined after a discovery session and provided in a tailored proposal.

A proven path from discovery to launch.

ONGOING SUPPORT PLANS

Web Maintenance

Cloud hosting management, SSL renewals, CMS updates, weekly backups, and minor content edits.

System Maintenance

Server monitoring, daily backups, security patching, and priority critical bug fixes.

Active Growth Retainer

Database and performance tuning plus dedicated developer hours for new features.

Enterprise High-Scale

24/7 uptime monitoring, scaled server management, and a larger dedicated developer pool.

Built to integrate. Built to last.

100%

Intellectual Property Transfer

You fully own all developed source code, custom algorithms, and system documentation.

No Total Overhaul

We integrate with your existing databases and software stack instead of forcing a costly replacement.

Enterprise-Grade Security

Role-based access controls, full audit logs, and encrypted, automated database backups.

Measurable Efficiency

Direct reductions in operational friction, manual processing costs, and administrative hours, with clear project scopes and predictable support plans.

TECHNOLOGY & INFRASTRUCTURE

Web & Frontend

Next.js

WordPress

Shopify

WooCommerce

Figma UI/UX

Mobile

Flutter

React Native

Firebase

Supabase

Data & Backend

PostgreSQL

MySQL

REST APIs

WebSockets

Cloud & Hosting

AWS

Google Cloud

Azure

DigitalOcean

Vercel

Render

Payments

PayMongo

GCash

Maya

Card gateways

Ready to automate your core systems?

Let's start with a discovery session to map your current workflows and identify the high-impact automation opportunities for your next phase of growth.
